

EDPS and EDPB Trainees' Conference

“Can we trust our artificial eyes? Data privacy in the age of human enhancement”

Society faces innovations that could transform the capabilities of the human body and mind in ways that are impossible to predict. In light of the increasing number of enhancement technologies that raise questions relating to surveillance, control and the profiling of individuals, the EDPS and EDPB trainees are organising a conference that will explore how technical developments affect our conception of being a human as well as ethical and legal issues that arise.

-  **Location:** 01P100 of the Wilfried Martens Building (EP)
Rue Belliard 80, 1000 Bruxelles
